

Sanket Sachin Bhoyane

Software Developer / UI UX Designer

Summary

Experienced Computer Programmer skilled in Full Stack Development, Web Development, Software Development & UIUX Design.

Work Experience

Software Developer , Mars Telecom System Pvt. Ltd

July 2022 - Present

- Successfully implemented SMS and email integration features within the egov project, enhancing communication capabilities and providing timely notifications to end-users.
- Spearheaded the development of digital signature functionality and created dynamic forms with robust validations, significantly improving the efficiency of data capture and processing for various project modules.
- Leveraged advanced technologies such as Spring MVC and Java to implement key functionalities, including the integration of web services, application workflow, DWR calls, and database interactions. Proficiently generated detailed reports using tools like Jasper and Tibco with SQL queries, contributing to enhanced data analysis and decision-making processes.

Live Projects

- Crafted a full Responsive 15-page website for a comprehensive service provider specializing in graphics, UI/UX design, web development, and LED signboard services. Seamlessly integrated communication features and contact forms, elevating the company's online presence. Hosted and optimized the site for enhanced user experience.
sanketprinters.com
- Designed and developed a full responsive education admission website utilizing Figma for UI/UX design and HTML, CSS, JavaScript, and PHP for implementation. The comprehensive 7-page website facilitates student admissions for international study programs. Integrated essential features including a contact form, direct calling, WhatsApp communication, and location tracking. Implemented PHP for seamless email functionality. Successfully hosted the website on a live server and acquired a domain name for enhanced accessibility. This project showcases a combination of design proficiency and development skills
